

Two Worldviews: The West versus Marxism

1. The secret behind Marx's worldview was that he diverted peoples' attention by his focus on economics while by inversion of moral values he sewed deep-rooted moral and mental confusion in the West.
2. His first target was **Moral Order**:
 - (1) The general behavioral condition within a society which is derived by common adherence to cultural codes of conduct and standards of behavior written or unwritten.
 - (2) The norms of a society provide constraints upon individual behavior. These norms are obeyed voluntarily by common consent which prevents anarchy within society.
 - (3) These written or unwritten standards bond individuals in a society together and provide that society with integrity and cohesion.
3. Moral confusion arises from a multitude of conflicting groups, each with its own value system. This leads to a loss of clear distinctions between what is right and what is wrong.
4. Lucifer's second target was **Moral Disorder**:
 - (1) Confusion and uncertainty about what is moral good and what is moral evil emerges in the souls of the people.
 - (2) This condition arises from the lack of any commonly accepted basis for the determination of moral principles.
5. From this moral disorder, deviations away from established societal standards begin to emerge.
6. As new standards are ensconced into the people's worldview, Lucifer's rhetorical veils become evident and eventually reveal his hidden agenda.

7. Each compartmentalized group plays into Lucifer's hands by being polarized into warring factions who produce tension which leads to conflict which results in change.
8. Remember the definition of the Marxist version of "dialectical materialism": Tensions and conflicts are the driving forces for change.
9. A century of "change" has resulted in the United States facing a crisis of national values which is exacerbated by the moral disorder prevalent in its society.
10. This is the fulfillment of the Marxist strategy of alienation of thought within a nation's mind-set.¹ Moral disorder is due to two factors: **(1)** An absence of moral values or **(2)** contradictory values which are exacerbated by the moral disorder prevalent in American society.
11. This leads to a sense of alienation and nihilism among the younger generation.
12. Nihilism: A belief that conditions are so bad as to make destruction desirable for its own sake independent of any constructive alternative.

A viewpoint that traditional values and beliefs are unfounded and that existence is senseless and useless.

Denial of any objective ground for moral truth.
13. If such thinking is allowed to spread throughout a society, it destroys that society's sense of cultural identity and integrity.
14. Marxist revolutionaries strive to undermine the societies they seek to topple by initiating and proliferating moral confusion.

¹ "Alienation: The state or experience of being isolated from a group or an activity to which one should belong or in which he should be involved. In Marxist theory, a condition of workers in a capitalist economy, resulting from a lack of identity with the products of their labor and a sense of being controlled or exploited" (*The New Oxford American Dictionary*, s.v. "alienation.").
