

The Heretical Dogma that Mary is the “Mother of God”

If soul life is imputed to biological life at conception, then the hypostatic union (H.U.) of undiminished deity (U.D.) with biological life (B.L.) would also occur in the womb.

Mother Dependence

Consequently, at the Virgin Birth, Mary would deliver the undiminished deity of Christ. This would give support to the false doctrine of her being the “mother of God.”
